Experience

Technical Operations @ WebVeda

Remote | March 2024 - Currently Working

- Designed and optimized high-converting landing pages for course offerings, increasing user engagement by **35%** and contributing to a **11.18% conversion rate**.
- Orchestrated the end-to-end automation of WhatsApp messaging** for live classes, seamlessly **managing 10K+ messages per month** and mitigating manual intervention by 80%.
- Architected and deployed a robust checkout and payment infrastructure leveraging Razorpay and Stripe, facilitating **10K+ transactions monthly**.
- Executed meticulous design audits using Hotjar, diagnosing friction points and implementing strategic UX enhancements that elevated **session durations by 20%** while curbing drop-off rates.

Youth Impactor @ 1M1B

Remote | January 2021 – August 2021

- Initiated AgriCraft, a tech-driven project addressing the pressing issue of stubble burning in rural communities.
- Designed innovative solutions leveraging technology to mitigate environmental impacts and improve agricultural practices.
- Collaborated with a diverse team of youth leaders to create impactful content and amplify outreach efforts.

Student Intern @ IBM

Remote | December 2020 – January 2021

- Gained hands-on experience with Machine Learning and Artificial Intelligence, exploring their real-world applications.
- Developed the 'Traffic' Project, utilizing traffic simulation and Google Teachable Machine to analyze and predict traffic patterns.
- Curated and prepared datasets for training ML models, strengthening foundational data science skills.
